Z. Meade read through the resolution to inform the committee. Z. Meade states that they are recommending President Morishita implements the resolution. J. She also states the location in which they would want it to be should change as it could become a problem in the future.

L. Greene states the comments made by Z. Meade made it easier to read the document. Z. Meade states they could approve the resolution with the recommendations instead of making an amendment for each comment. Z. Meade states there are two items that need citations to support the document. J. Buckholz states she has a graph that could be cited and included in the document. Z. Meade would like to make it clear in the document as to who is speaking. Z. Meade asked B. Martinez Bailon as to what was discussed in the meeting on supplying majority of the campuses energy demand. B. Martinez Bailon states instead of saying that they are asking the president to completely run the school on solar energy, the key work majority should be included. The committee does not want the resolution to be turned down. They state it should include the amount of energy they should invest in and a timeline. J. Buckholz states it shouldn’t be prescriptive as it will be built in alliance to what the Chancellor would want. Z. Meade asks the committee to come up with substitute words for the weak words. The committee states they would prefer the term demand.
Yield to T. Tutakhil.
T. Tutakhil states the administration reading the resolution would not like the terms such as demand since they would like to shake hands with the administrator. J. Buckholz believes it should be demand due to the topic of climate change.
