l) Taught entirely on-line, on-ground, ☒ On-line ☒ On-ground ☒ Hybrid (both online and on-ground)
If the answer is on-line or hybrid, also respond to the additional three questions below:
   i. Describe the strategies for teaching this course either in an on-line or hybrid format. (Discuss the instructional methods for offering the course(s) content in an online or hybrid format)

HDEV is a WASC approved online degree program, and all courses are approved for online and hybrid delivery format.

Course documents and materials (verbal, graphic, and animation) will be made available to students via CSUEB Blackboard. BB also allows presentation of video lectures and short instructional video episodes available 24/7 to the students. Tests (multiple choice, short answer, short essay, matching, etc.) are done on BB as well. Interactive tools available on BB, such as Wiki, Blog, Discussion Board, PeerMark, Groups, etc., will be used to engage student participation, collaboration, and peer learning. TurnItIn on BB is used to raise consciousness of academic honesty and avoid plagiarism. GradeMark on BB is used for electronic grading with rubrics, which enhances grading specification, and efficiency and enhance learning.

   ii. Describe the experience, support and/or training available for the faculty members who will teach this online or hybrid course. (Discuss how you will ensure that faculty will know how to teach online or in a hybrid format)

HDEV/WOST regular or lecturer faculty members have constant in-service training with the help of the university’s Online Campus Office. Some faculty meeting time is dedicated to discuss instructional technology and online teaching pedagogy. New faculty members are referred to the Online Campus Office for initial training, and receive peer support and consultation from department faculty colleagues. Currently, 3 regular faculty members in HDEV have completed 2 official QM workshop courses for online instruction sponsored by CSUEB Online Campus. Some faculty members are seeking official QM certification for some online courses, as supported and funded by the CSUEB Online Campus Office.

   iii. Assessment of online and hybrid courses. (Discuss how your department will assess the quality of the online and/or hybrid instruction to ensure it is equal or superior to your on-ground instruction.) Note: Assessment of learning is NOT addressed through student evaluations.

Online and hybrid courses are subject to the same evaluation processes as on-ground courses as part of the department’s annual student learning outcomes assessment process. Online courses will be assessed by students in the courses by using the CSUEB’s standard student course evaluations implemented online, according to the university’s policy on student course evaluations. In addition, HDEV has annual assessment activities, assessing one program SLO each year, and complete assessing all HDEV SLOs
within every 5-year cycle. When student artifacts are collected for the program SLOs assessment, they include student work from both on-ground and online courses. Each Spring, regular faculty hold retreat-type meetings for program SLO assessment, to assess the student artifacts, discuss and diagnose student learning issues, and find solutions to address the issues in closing the loop process. In addition, currently, 3 HDEV online courses are engaged in the national QM online course quality review process, sponsored by CSUEB Online Campus.

m) Offered on state-support or self-support: ☒State-support  ☐Self-support
