l) Taught entirely on-line, on-ground,  ☒ On-line  ☒ On-ground  ☒ Hybrid (both online and on-
   ground)
   If the answer is on-line or hybrid, also respond to the additional three questions below:

   i. Describe the strategies for teaching this course either in an on-line or hybrid format. (Discuss the
      instructional methods for offering the course(s) content in an online or hybrid format)

   HDEV is a WASC approved online degree program, and all courses are approved for online and hybrid
   delivery format.

   Course documents and materials (verbal, graphic, and animation) will be made available to students via
   CSUEB Blackboard. BB also allows presentation of video lectures and short instructional video episodes
   available 24/7 to the students. Tests (multiple choice, short answer, short essay, matching, etc.) are done
   on BB as well. Interactive tools available on BB, such as Wiki, Blog, Discussion Board, PeerMark,
   Groups, etc., will be used to engage student participation, collaboration, and peer learning. TurnItIn on
   BB is used to raise consciousness of academic honesty and avoid plagiarism. GradeMark on BB is used
   for electronic grading with rubrics, which enhances grading specification, and efficiency and enhance
   learning.

   ii. Describe the experience, support and/or training available for the faculty members who will
       teach this online or hybrid course. (Discuss how you will ensure that faculty will know how to
       teach online or in a hybrid format.)

   HDEV/WOST regular or lecturer faculty members have constant in-service training with the help of the
   university’s Online Campus Office. Some faculty meeting time is dedicated to discuss instructional
   technology and online teaching pedagogy. New faculty members are referred to the Online Campus
   Office for initial training, and receive peer support and consultation from department faculty colleagues.
   Currently, 3 regular faculty members in HDEV have completed 2 official QM workshop courses for
   online instruction sponsored by CSUEB Online Campus. Some faculty members are seeking official QM
   certification for some online courses, as supported and funded by the CSUEB Online Campus Office.

   iii. Assessment of online and hybrid courses. (Discuss how your department will assess the quality
       of the online and/or hybrid instruction to ensure it is equal or superior to your on-ground
       instruction.) Note: Assessment of learning is NOT addressed through student evaluations.

   Online and hybrid courses are subject to the same evaluation processes as on-ground courses as part of
   the department’s annual student learning outcomes assessment process. Online courses will be assessed
   by students in the courses by using the CSUEB’s standard student course evaluations implemented
   online, according to the university’s policy on student course evaluations. In addition, HDEV has annual
   assessment activities, assessing one program SLO each year, and complete assessing all HDEV SLOs
within every 5-year cycle. When student artifacts are collected for the program SLOs assessment, they include student work from both on-ground and online courses. Each Spring, regular faculty hold retreat-type meetings for program SLO assessment, to assess the student artifacts, discuss and diagnose student learning issues, and find solutions to address the issues in closing the loop process. In addition, currently, 3 HDEV online courses are engaged in the national QM online course quality review process, sponsored by CSUEB Online Campus.

m) Offered on state-support or self-support: ☒State-support ☐Self-support
