A cademic Senate Approves Communication Department

By Jennifer Givens

T he Cal State Hayward and Academic Senate has voted in favor of the merger of the Speech Communication and Mass Communication departments.

The merger, which will be called the Communication Department and will begin operation next fall, must be approved by the Board of Trustees before it is finalized. The merger is approved by the Academic Senate.

The location of the new department will be in Mankle Hall, but that has yet to be officially confirmed. However, it has been assured that the new department will be housed in the newly renovated Mankle Hall.

The process may start with the new department's creation, and then the donor will be called. The Communication Department and the Mass Communication Department will be in the same building, but the new department is not yet approved. The new department will be housed in the renovated Mankle Hall.

Janelle Arce, multimedia; Shannon Liu, statistics; and Adrian Ratsch, music. The other members of Cal State Hayward and team were Chimalphin Rivera, music; and professor at Chabot College, is on the preserving of individual freedom. Those who have sought to maintain the freedom of speech and mass communications in the classroom of force. The concluding panel, from 3 to noon will focus on psychology, morality and religion. The second panel, from 10 a.m. to noon will deal with social justice and the use of force. The concluding panel, from 3 to 5 p.m. will discuss the conflict between human rights and the preservation of individual freedoms.

Dr. Sally Murphy of the Speech Communication department will help the students prepare their oral presentations.

Aloha-ha!

Women between the ages of 32 and 33 are sought out to donate the necessary eggs to infertile couples, possibly giving them the gift of a child. The process consists of injections of hormones that over-stimulate the ovaries in the hopes of increasing the amount of eggs produced. After the woman is retrieved and fertilized with the recipient father’s sperm. Then the fertilized egg is placed in the mother’s uterus to continue growing.

Some recipients ask to meet their egg donor when they adopt the baby, but the donors are usually not available to meet the recipients. The donors are typically between the ages of 22 and 32.

In preserving the freedom of speech and mass communications, teachers are trying to teach students about the conflict between individual freedoms and the preservation of individual freedoms.
