

CALIFORNIA STATE UNIVERSITY, EAST BAY

Designation Code: 2007-08 **CAPR 16**

Date Submitted: April 7, 2008

TO: The Executive Committee of the Academic Senate
FROM: Committee on Academic Planning & Review (CAPR)
SUBJECT: Program Review Schedule for the Computer Networks Program
PURPOSE: For the Information and/or Action of the Executive Committee of the Academic Senate

ACTION

REQUESTED: That the Executive Committee Approve the Proposed Change in the Program Review Schedule for Computer Networks

Now that the Computer Networks program (formerly Telecommunications Systems) is entirely under the auspices of the Mathematics and Computer Science department and no longer connected to the College of Business, it has come to CAPR's attention that the program's review pattern should coincide with that of other Computer Science programs. Currently, these programs are scheduled for review in 2009-2010, while Computer Networks is scheduled for 2008-2009.

As a result, CAPR is formally requesting that this change be placed on the official Program Review roster and the university's Academic Plan for the Cal State University system. This would shift the five-year review of the program forward one year in its cycle of review, after which a new five-year review pattern would be established.

The next five-year review of Computer Networks would then take place in 2009-2010.
