

Need software for your CSUEB computer? Launch AppsNow! AppsNow is an IBM BigFix Self Service Portal allowing users to install software at their own convenience. This self-service feature allows users to install CSUEB authorized software without the need of an administrator login. AppsNow will contain the latest software versions as well as new offers.

To access AppsNow on your Windows OS, go to your system tray and click on the BigFix button .

This launches  IBM BigFix Support Center window. Click on the "Available Software" tab to view available software(s) to install.

Select or search for the desired software and click "Install". If you want to monitor progress, click on the "Progress" tab. Once your software is installed, you may close the  IBM BigFix Support Center window and begin using your application from the Windows start menu.
