

- Engage in Kinesiology research experiences to develop skills that employers and graduate programs are looking for!
- Work in supportive research teams of students, guided by one or more faculty mentors!
- Participate in quarterly professional development seminars, led by CSUEB faculty, as well as professionals and researchers from all over North America!
- Develop professional and social networks that will support you during, and well beyond college!

KRG student researchers posing with President Morishita during a KRG data collection session

KRG students and faculty @ American College of Sports Medicine Conference in Boston MA (2016)
