Soccer Ineligibility Probe Raises Questions about DII Move

By Ryan Martinovic

A new athletic clinic offered free of charge by the Student Health Center expected to begin in the fall was added to the agenda at the Board of Trustees meeting held last week.

The clinic, which would be provided by the Student Health Center, will offer HIV Testing, an Immunization Clinic, a Health Assessment Clinic, and a Weight Management Program.

This is not an ordinary 'Godspell.' It's generally the New Tes

By Isfalt, a junior majoring in communication, was appointed to the former ASI board voted to hold a run-off election to fill the vacant board seat. She is the first woman to hold the position of ASI President.

The new ASI President is looking forward to working with the ASI executive board and the university community to promote student involvement and support.

Students Not Using Free Health Services

By Timea Tamas

Even though the numbers are not what the health center expected, they say some students are staying away due to the lack of awareness about the services offered.

Last spring quarter, Isfalt and her opponent Rasiya Parker ran for the position of ASI President and were both elected to the position. However, Parker was later forced to withdraw from the race due to a conflict with her studies.

The Student Health Center is attempting to reach out to students who may not be aware of the services offered and encourage them to use the center.

Students who are not using the services are urged to contact the health center and inquire about the services available.

F orget Ani Froy for being like Shylock from the Shakespearean play. He is more like an lawyer for the Empire State Building.

Throughout history, people have treated the earth, sustainable practices, and ethical considerations with little regard. Yet, more and more people are focusing on sustainability. The Earth University is one such institution.

The University of the People, a new online university, was recently awarded a grant from the United Nations to open its doors to learners worldwide.

Students will have access to courses in a variety of subjects, including sustainability, environmental sciences, and humanities. The goal is to create a community of learners who can work together to solve some of the world’s most pressing problems.

This is not to say that the university will replace traditional universities, but it is a step towards creating a more inclusive and accessible education system.

The University of the People is committed to providing a quality education to students who may not have had the opportunity to attend traditional universities. The university’s online format allows students to learn at their own pace and on their own schedule.

The University of the People is an excellent example of how technology can be used to provide education to a global audience. It is a testament to the power of the internet to connect people and create a more connected world.
