

BIOGEOCHEMISTRY

ENSC 634

Hybrid

(T online, TH in person 6-7:40pm)

- The Earth and Environmental Sciences Department is offering a Biogeochemistry course open to graduate and undergraduate students
- This can be used as a depth elective for Geology and Environmental Science majors
- We will cover the the biological, geological, physical, chemical and anthropogenic processes that regulate the cycling of elements
- The course will highlight climate change, wetlands and the analysis of large datasets in R
- Please contact Patty Oikawa if you have questions: Patty.Oikawa@csueastbay.edu
