Position Description:

Assist Head Teacher to deliver fun, engaging project-based STEM activities on site at elementary schools. Promote the SAfG mission and scientist’s mindset in each class (6 C’s: Curious, Committed, Confident, Careful, Creative and Changemakers). Meet with the Head Teacher and Manager of Programs virtually every week. Use SAfG-Chabot Space Science Lesson Plans. Read and review provided facilitator guides available for each lesson. Integrate your understanding of the socio-economic and diverse backgrounds of the students and social emotional learning skills into your instruction. (This is key to changing girls’ attitudes and the beliefs they form about STEM.) Assist the organization with assembly of STEM supplies into kits (at SAfG’s main office and storage facility).
