**Process Monitor (access is limited to specific users)**

Process Scheduler includes the following enhancements in this release:

- Auto-refresh of Process Monitor
- Ability to select configured server on Run Control Pages and Process Monitor
- Ability to reset and clear filters in Process Monitor
- Actions Menu for Process List on Process Monitor

**Run Control Naming Convention**

*Issue:*

Run Control names that include a “-R” will cause the process not to run.

*Resolution:*

Create a new Run Control that does not include a “-R”, it is recommended to use an underscore in lieu of a dash.
