

# CAL STATE EAST BAY - COORDINATED CARE MODEL

From course roadmap to financial aid to technology to internships and post graduate advising, Cal State East Bay provides students the support they need to succeed.

## FASST Advisor

Freshman and Sophomore Success Team (FASST) advisors help students transition to college by providing course roadmaps based on majors as well as referrals to campus resources.

## Financial Aid

The Office of Financial Aid & Scholarships provides overall assistance to students in financing their cost of education. This includes education on the financial aid process, eligibility requirements and scholarship opportunities.

## Post Graduation Support

Academic Advising and Career Education (AACE) counselors are available to help students search for jobs or get careers services in the first six months after graduation.

## A Coordinated Care Model: Freshman and Sophomores

All freshman and sophomore students at Cal State East Bay are assigned at least one Freshman and Sophomore Success Team (FASST) advisor. Some students, who qualify, may also get holistic support from access and retention programs.

## Majors, Internships and Career Exploration

For students who don't yet know what major they want or have an interest in a career, they can contact the Academic Advising and Career Education (AACE) office. AACE counselors help students explore careers that inspire them and choose a major and internships to prepare them for their goals.

## Degree Audit Report (DAR)

The Degree Audit Report, on MyCSUEB, helps students track course progress: Green is for classes completed, yellow is for those in progress, and red is for requirements that have not been met.

## College Advising

Once freshman and sophomore students obtain enough course credits, they transition from Freshman and Sophomore Success Team (FASST) counselors to advisors at their corresponding college all the way through graduation. A student's major(s) will determine which college advising location they should reach out to.

There are four colleges:

- College of Business and Economics (CBE)
- College of Education and Applied Students (CEAS)
- College of Letters and Social Sciences (CLASS)
- College of Science (CSCI)

## Compass

The MyCompass student portal is a virtual "one-stop-shop" for enrolled students, which allows them to effortlessly track their progress, schedule appointments, and transact university business.

It integrates current student systems, such as MyCSUEB, Blackboard and BayAdvisor all in one place.
