

**CALIFORNIA STATE UNIVERSITY, EAST BAY
NURSING DEPARTMENT REQUIRED RECORDS**

BACKGROUND CHECK **MUST use Nursing Department Background Check Agency ONLY

DRUG SCREENING **MUST use Nursing Department Drug Screening Agency ONLY

TITERS = blood tests (not shots). **Even if you have immunization/shot records, we still require proof of immunity through a blood test for surface antibodies (titer) for #1-3.

1. RUBELLA (German Measles), RUBEOLA (Regular Measles) and MUMPS

Positive titer (immune) required for **ALL THREE SEPARATELY**. Test for IgG antibody.

If titer is negative, provide proof of **two** live virus MMR vaccinations received after the date of the negative titer at least **one month apart**.

****Must get another titer after shot series is complete.**

2. VARICELLA

Positive titer (immune) required. Test for IgG antibody.

If titer is negative, provide proof of **two** doses of live virus received after the date of the negative titer at least **one month apart**.

****Must get another titer after shot series is complete.**

3. HEPATITIS B

Positive titer (immune or “reactive”) required. Test for Hep B surface antibody.

If titer is negative, provide proof of **three** doses of live vaccination series received after the date of the negative titer. (Second shot must be **1 month** after first shot and third shot must be **5-6 months** after second shot).

****One-two months after 3rd shot in series – must get another titer as proof of immunity.**

4. FLU VACCINE

Get a flu vaccination (influenza) for the current flu season. Proof must contain shot date no earlier than September 1.

5. DIPHTHERIA-TETANUS-PERTUSSIS (Tdap) shot within ten years.

****This is an “adult” shot, not DTaP or DTP (childhood versions).**

****A Td shot (Tetanus-Diphtheria only) does NOT cover this requirement.**

6. PPD (Tuberculosis Skin Test) - 2 NEGATIVE results satisfy this requirement or 1 negative Quantiferon blood test.

- **If you have NOT had a TB skin test within the last 12 months:**

Submit a Negative two-step within 3 weeks of each other (4 doctor visits total) –**OR**– Submit 1 negative QuantiFERON Gold blood test or T Spot test within 1 year.

- **If you have ONE TB skin test result within the last 12 months**

Submit it plus ONE MORE TB test result within 12 months of your most recent one (one-step result).

- **If you have TWO TB skin test results within the past 2 years**

Submit both PPD results. The 2nd result must be within 12 months of right now. The 1st result must be no more than 12 months before your 2nd result. If MORE THAN 12 months passed between your first and second results, you need to get ONE MORE TB test (one-step).

PPD Results last for 12 months – do not allow them to expire.

If POSITIVE PPD, then a Chest X-Ray REPORT within 3 years is required **AND** negative symptom screen. (Use Nursing Department Annual TB Symptom Screen Form if your PPD is positive).

7. COVID-19 Vaccine and booster (if eligible) or exemption request

Submit proof of a complete COVID-19 vaccine series of 2 shots at least 21 days apart or as recommended depending on the vaccine type received and appropriate booster. Proof must include manufacturer and vaccination date/s.
