

Responsible Conduct of Research (RCR) Training

[Background](#)

[Accountability/Responsibility](#)

[Federal Agency Policies and Procedures](#)

[Training Requirement Matrix](#)

[RCR Training Topics](#)

[RCR Training Completion Requirements](#)

Background

Responsible Conduct of Research (RCR) is defined by NIH, "...as the practice of scientific investigation with integrity. It involves the awareness and application of established professional norms and ethical principles in the performance of all activities related to scientific research." Moreover, the NSF states that RCR is "critical for excellence, as well as public trust, in science and engineering." Consequently, education in RCR is considered essential in the preparation of future scientists and engineers.

RCR is achieved by understanding and adhering to the principals of ethics and integrity. The objectives of RCR training are multi-faceted:

- Provide an understanding of ethics
- Encourage best practices in the conduct of research and scientific investigations
- Foster an ability to recognize an ethical choice and the ability to make a principled decision

[California State East Bay's Responsible Conduct of Research Policy](#) requires undergraduate students, graduate students, postdocs, and participants receiving financial support (including salaries and wages, tuition, or stipends) from NSF, NIH, USDA-NIFA, or from other agency awards that require such, to receive training in Responsible Conduct of Research in alignment with the applicable federal agency's policies and procedures.

Accountability/Responsibility

Individuals:

It is the responsibility of the individual employee engaged in research funded by a federal agency to complete required RCR training within the time frame prescribed by the agency or within an appropriate reasonable time frame. Failure on the part of the individual to complete the necessary training may result in the need to terminate the financial support.

Principal Investigators:

It is the responsibility of the Cal State East Bay Principal Investigator to ensure that the individuals engaged in research are informed of the RCR training requirement and that the requirement has been met. The PI must keep documentation of the completion, such as in the form of a log tracking time in session, completion certificates, or other documentation.

Federal Agency Policies and Procedures

Examples of federal agency RCR policies and procedures are provided below. Check federal guidance for requirements of other federal agencies:

[National Institutes of Health \(NIH\) Update on the Requirement for Instruction in the Responsible Conduct of Research](#)

NIH Policy: "This Notice applies to the following programs: D43, D71, F05, F30, F31, F32, F33, F34, F37, F38, K01, K02, K05, K07, K08, K12, K18, K22, K23, K24, K25, K26, K30, K99/R00, KL1, KL2, R25, R36, T15, T32, T34, T35, T36, T37, T90/R90, TL1, TU2, and U2R." "This policy also applies to any other NIH-funded programs supporting research training, career development, or research education that require instruction in responsible conduct of research as stated in the relevant funding opportunity announcements."

[National Institutes of Health \(NIH\) FY 2022 Updated Guidance: Requirement for Instruction in the Responsible Conduct of Research](#)

“Format of Instruction: Discussion-based instruction in the responsible conduct of research is expected to remain a key feature of RCR training and to include substantive face-to-face interaction among participants and faculty. However, recognizing that advances in video conferencing now allow for effective “face-to-face” discussions to occur electronically, institutions may wish to consider incorporating video conferencing options into their RCR instruction, provided that those options are utilized in a way that fosters discussion, active learning, engagement, and interaction among the participants. At the same time, video conferencing should not be the sole means for meeting the requirement for RCR instruction, and a plan that employs only video conferencing will not be considered acceptable, except in the circumstances described in [NOT-OD-10-019](#), such as short-term research training and research education programs.”

[National Science Foundation \(NSF\) Responsible Conduct of Research \(RCR\)](#)

"NSF expects institutions to be able to verify that those students (undergraduates and graduates) and postdoctoral researchers who receive NSF funds (support from salary and/or stipends to conduct research on NSF grants) will obtain RCR training. However, NSF anticipates that institutions will develop their RCR training programs in a manner that helps prepare the next generation of researchers, including the consideration of risks or other factors associated with student and postdoctoral researcher participation in research."

"The RCR training requirement applies to new proposals submitted, or due, on or after January 4, 2010, to conduct research, which excludes, for example, conference, symposium, workshop, or travel proposals."

"The RCR training plan must be in place at the time of proposal submission."

[U.S. Dept. of Agriculture \(USDA\) Responsible and Ethical Conduct of Research](#)

"In accordance with sections 2, 3, and 8 of 2 CFR Part 422, institutions that conduct USDA-funded extramural research must foster an atmosphere conducive to research integrity, bear primary responsibility for prevention and detection of research misconduct, and maintain and effectively communicate and train their staff regarding policies and procedures." "The general content of the ethics training will, at a minimum, emphasize three key areas of research ethics: authorship and plagiarism, data and research integration, and reporting misconduct."

Training Requirement Matrix

Federal Agency	To Whom it Applies	What	Verification	Completion
National Institutes of Health (NIH)	Trainees, fellows, participants, and scholars, D43, D71, F05, F30, F31, F32, F33, F34, F37, F38, K01, K02, K05, K07, K08, K12, K18, K22, K23, K24, K25, K26, K30, K99/R00, KL1, KL2, R25, R36, T15, T32, T34, T35, T36, T37, T90/R90, TL1, TU2, and U2R;. and Other NIH-funded programs if clearly stated in the award opportunity announcements.	Online + in person interaction. In person can be through video-conference, but at some point training must include in person face-to-face interaction.	PIs track and release tracking records upon request. Students keep documentation of their attendance or completion. ORSP verifies completion with PIs.	Institution must confirm and document that RCR training has occurred Training should occur no less than once every 4 years.
National Science Foundation (NSF)	All undergraduates, graduate students, and postdoctoral researchers who will be supported by NSF to conduct research.	Online	PIs track and release tracking records upon request. Students keep documentation of their attendance or completion. ORSP verifies completion with PIs.	Institution must confirm and document that RCR training has occurred. Training should occur no less than once every 4 years.
US Department of Agriculture (USDA)- National Institute of Food and Agriculture (NIFA)	All program directors, faculty, undergraduate students, graduate students, postdoctoral researchers, and any staff participating in a research project funded by	"Off campus" or "On campus"	PIs track and release tracking records upon request; students keep documentation of	Institution must confirm and document that RCR training has occurred Training should occur

	NIFA receive RCR training.		their attendance or completion.	no less than once every 4 years.

RCR Training Topics

- Ethics/Integrity
 - Misconduct
 - Reporting

- Stewardship
 - Collaborative Research
 - Conflicts of Interest
 - Data Management
 - Mentors
 - Research Subjects
 - Animal Subjects
 - Human Subjects
 - Security and Safety(Biosafety, Hazards, Inclusivity, Discrimination-Free)
 - Whistleblower Protections

- Published Research
 - Authorship
 - Peer Review

RCR Training Completion Requirements

The tables below may be copied and used for tracking purposes, however, other tracking spreadsheets are allowed.

RCR Training Completion Tracker	
Project Title(s):	Sponsor:
Name:	Academic Year:
Cal State East Bay Training Components	Date Completed (Documentation is Required)
CITI – RCR - Mandatory	
CITI – IRB – When Applicable	
CITI- IACUC - When Applicable	
In-person instruction provided by Principal Investigator or CSUEB in-person workshops (e.g., CEUs, Certificates, for credit courses, ORSP Workshop, or other programs). --Mandatory for NIH (8 hrs) --Optional for NSF, USDA	
Other: Additional RCR, Compliance, or Research Training may be taken and documented to satisfy the online or in-person training requirements only if pre-approved by PI (in communication with ORSP). (e.g., training during documented department meetings, seminar series, conference trainings, professional association communications)	
RCR training obtained from another institution within the past 18 months, provide documentation
